

ABSTRACT

-26-

The invention relates to a polymer mixture based on the (meth)acrylate (co)polymer components a), b), c), and/or d) according to Claim 1, where a test specimen produced from the polymer mixture simultaneously has the following properties:

- I. a tensile modulus (ISO 527) of at least 2600 MPa,
- II. a Vicat softening point VSP (ISO 306-B50) of at least 109°C,
- III. an impact strength (ISO 179-2D, flatwise) of at least 17 kJ/m², and
- IV. a melt index MVR (ISO 1133, 230°C/3.8 kg) of at least 1.5 cm³/10 min.

The invention further relates to injection mouldings and to the use of the polymer mixture for producing injection-moulded parts.
